The applicant's amendment filed on 19-April-2008, overcome the cited prior art with respect to the independent claims:

Independent claims 15 and 24 were amended to recite receiving a pre-authentication request to establish a communication link between the client and a selected application server in the list; providing the selected application server with information, including the client identifier, for authenticating a link request sent directly from the client to establish a link between the client and the application server, and providing the client with the client identifier to forward the link request directly to the selected application server to establish the link between the client and the application server.

The prior art of record do not disclose, teach, or suggest the above claimed limitations (in combination with all other features in the claim.)
